	- 2 -	25X <sup>2</sup>
C.	About 300 meters south of Aleksandrovo village (N 42-42, E 27-36), Pomorie Okoliya, a railroad bridge under construction over a small river; the foundations of the bridge had been laid and the supports of the bridge were under construction; the bridge was about 15 meters in length;	25X′
d.	Okoliya, a second viaduct under construction over the Burgas-Varna road. The details of this bridge are probably the same as those described in paragraph "b" above; the concrete for the bridge has been poured and the route on both sides has been raised with the use of the equipment described in paragraph "a" above, prob-	25X′
	ably requisitioned from the surrounding villages;  about one kilometer east of the viaduct,  (excavator) loading earth into trucks and carts;	25X1
8.	North of and near Kamenar village (N 42-38, E 27-34), Pomorie Okoliya,  a large rock quarry in which two large rock-loaders, probably equipped with gasoline motors, were producing the necessary gravel for the railway line and loading it into trucks of the type described in paragraph "a" above for transporting to the line;	25X1
ſ.	Northeast of Dolmo Ezerovo village, on an unidentified stretch of the railway line. near the "Geren" locality where there is a small bridge, a 2-story building about 25 x 15 meters in size.  not yet painted, for the use of the railroad station	25 <b>X</b> 1
g.	a completed section of the railroad line branching off from the old Sofia-Burgas rail line, about 4-5 kilometers north-west of the Dolno Ezerovo railroad station and 4.5 kilometers east of Kamenar village, connecting with the new rail line probably before the bridge over the Aytos River; this section will be used, in all probability, to take care of rail traffic from Elkhovo directly, without the necessity of passing through Burgas.	
as gau at ly	general impression was that the line is being constructed the line will be standard- ge, since he personally saw trains operating with gravel loads maneuvering Dolno Ezerovo railroad station and going towards the north along the new- constructed line. travelled by rail quite often and never heard one speaking of the existence of wide-gauge lines.	25X1
	struction of New Troyan-Levskigrad Rail Line	
		25X1
	on this line there is to be a large tunnel.	
Con	struction of a Strategic Road Through Strandzha	
and E 2	the construction of a strategic road starting from the gas-Malko Turnovo read, somewhere around "Bosna" Peak (N 42-11, E 27-26) Konak village (N 42-10, E 27-26) and going to Kalovo village (N 42-08, 27-32), continuing on to Zubernovo village (N 42-05, E 27-34) and Gramatico village (N 42-03, E 27-39) to connect with the Malko Turnovo-Tsarevo d.	25X1
The	e above-mentioned road was constructed probably during 1949-1950 and goes
